

Task 1 part 1

a) User feedback

1. Is MCAST website easy to access?

[자세한 정보](#)

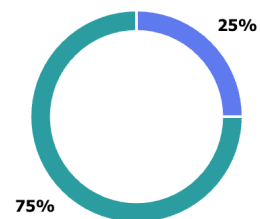

- Yes 3
- No 1

2. What is the main thing that irritates you while using the website?

[자세한 정보](#)

- The time that takes to load 1
- The design that is inconsistent 0
- Layout being unorganised 3
- Contact numbers unclear for help 0

3. What was the most inconvenient thing about using the website?

[자세한 정보](#)

4
응답

최근 응답

"It takes time to load"

"Necessary Concrete Information is uneasy to find. (ie. Where to apply.)"

"The information was hard to grasp"

...

4. What are the things that would make the website better?

[자세한 정보](#)

4
응답

최근 응답

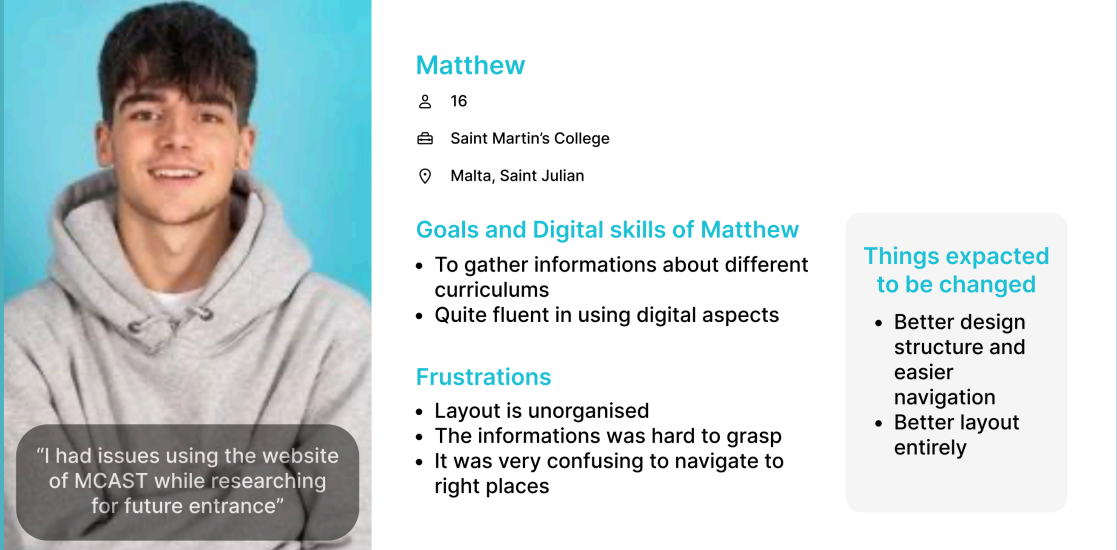

"The navigation should be better"

"More condensed information."

"Better design structure, easier navigation"

...

b) User persona

The user persona card for Matthew is set against a teal background. On the left is a portrait of a young man with dark hair wearing a grey hoodie. A speech bubble from the photo reads: "I had issues using the website of MCAST while researching for future entrance". To the right of the photo, the name "Matthew" is in bold teal. Below it are icons for age (16), school (Saint Martin's College), and location (Malta, Saint Julian). Further right, the heading "Goals and Digital skills of Matthew" is followed by two bullet points: "To gather informations about different curriculums" and "Quite fluent in using digital aspects". Below this, the heading "Frustrations" is followed by three bullet points: "Layout is unorganised", "The informations was hard to grasp", and "It was very confusing to navigate to right places". On the far right, a light grey box titled "Things expected to be changed" contains two bullet points: "Better design structure and easier navigation" and "Better layout entirely".

Matthew

👤 16

🏫 Saint Martin's College

📍 Malta, Saint Julian

Goals and Digital skills of Matthew

- To gather informations about different curriculums
- Quite fluent in using digital aspects

Frustrations

- Layout is unorganised
- The informations was hard to grasp
- It was very confusing to navigate to right places

Things expected to be changed

- Better design structure and easier navigation
- Better layout entirely

"I had issues using the website of MCAST while researching for future entrance"

c) Research summary

The research helped me understand what users (prospective students) experienced while using the MCAST website. Mainly, the problems were the structure and the layout of the website, which made it difficult to navigate to the right information they wanted. With this information, I can focus more on the structure part for a better website. Also, the information helped to fill in the information for the user persona. The research results helped me to create a fake user persona that seemed to be having problems while using the MCAST website. Also, some people answered that using the MCAST website is easy to access. From this, I can claim that not every single part of the website should be fixed.

Task 1 part 2

a) Strengths and weakness

Strengths

1. Bold colour that gives impact
2. Typography that is easy to read
3. Technical implement such as coding easy to access

Weakness

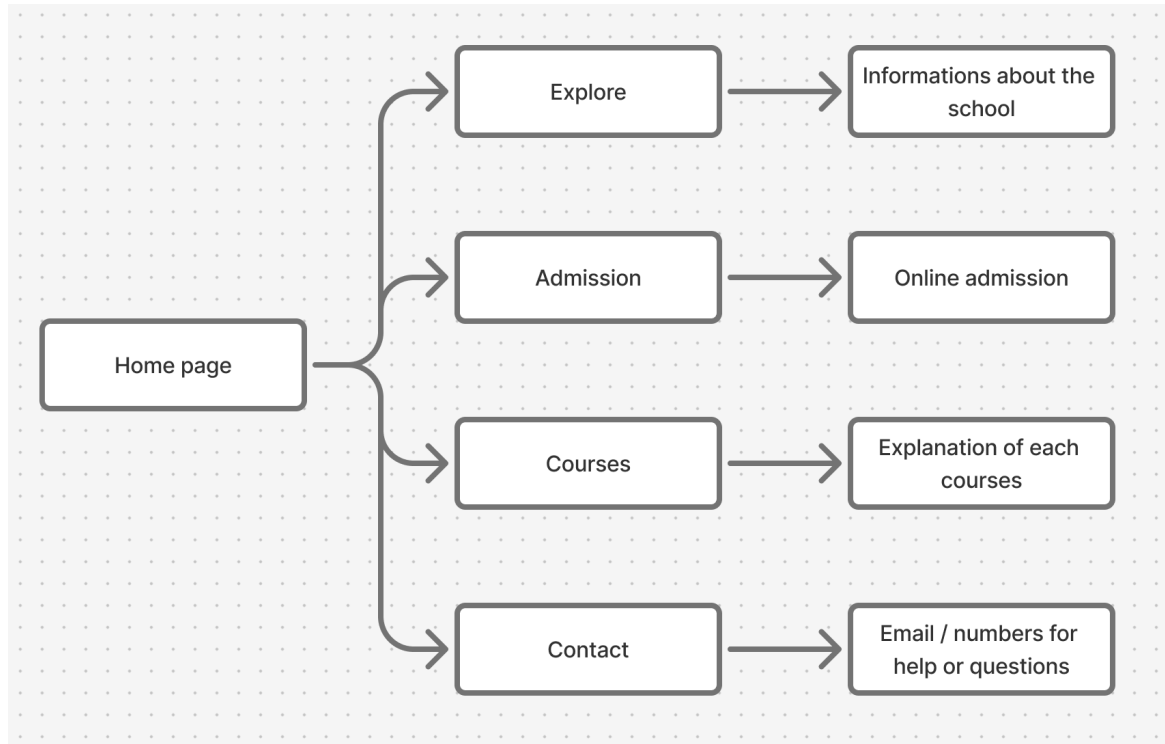

1. Navigates to unexpected places
2. Layout overlays each other
3. Accessibillity tool existing but not much useful
4. Important contents not organised and unclear which is more important
5. Respond unclear when need in help

b) Improvement plan

Issue identified	Evidence / Reason	Proposed improvement
Time that takes to load	User feedback	Remove unnecessary codes
Unorganised layout	User feedback	Organise layouts
Informations unclear	User feedback	Make informations right in position
Navigates to unexpected places	Self evalutaion	Make navigation clear and straight forward
Important contents unclear	Self evaluation	Make sure important news pop out first

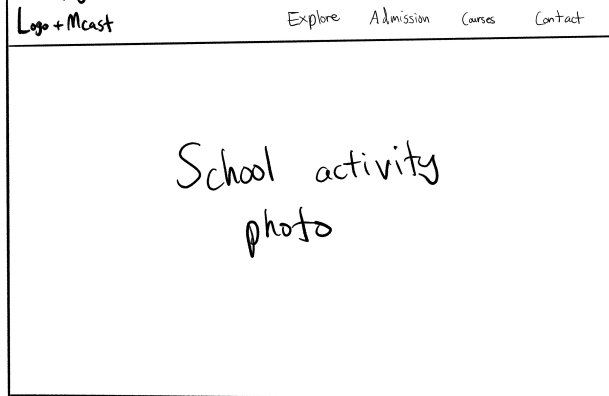

Task 1 part 3

a) Site map

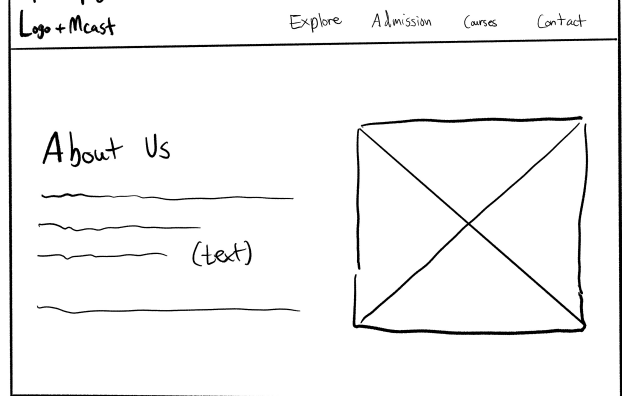

b) Wireframes
